

## **Chp1 Introduction**

### **Why did we choose to make lawyer.AI**

Lawyer.AI is an AI tool that utilizes natural language processing to assist Everyone with their legal issues.

Its primary use cases include legal research and suggestions.

Lawyer.AI can help people to find their legal solution in a matter of seconds, making it much faster and easier access of law details on their hand.

It can also be used to summarize legal documents and present these summaries in a format with help of Legal AI powered Assistant.

Lawyer.AI also provides suggestion of lawyers how have worked on similar cases before and provides the user ways to connect to them.

Furthermore, Lawyer.AI can assist in legal research by finding and sharing relevant cases, statutes, and legal principles, and even providing summaries of these things.

Overall, Lawyer.AI aims to streamline and automate various legal processes, allowing public to focus on their need.

### **What are its Advantages.**

1. Time Savings: Lawyer.AI can automate routine tasks such as contract drafting, review, and research, freeing up lawyers to focus on more complex and high-value tasks.

2. Increased Accuracy: By leveraging AI-powered technology, Lawyer.AI can reduce the likelihood of human error (Biasness, Emotions etc.), ensuring that contracts and legal documents are accurate and compliant with relevant laws and regulations.

3. Improved Consistency: Lawyer.AI can ensure consistency in contract language, formatting, and style, which is particularly important for large law firms or corporations with multiple lawyers working on similar documents.

4. Ease of justice: By automating this legal field with AI we can expect to ease the pressure and misunderstanding happening in this field to all the normal people.

6. Access to Knowledge: Lawyer.AI can provide knowledge to public with instant access to a vast knowledge base of legal information, including case law, statutes, and regulations.

7. Scalability: Lawyer.AI can handle large volumes of legal documents and contracts, making it an ideal solution.

8. Spreading Awareness: Lawyer.AI is primarily focused to serve normal people who are scared and have a taboo for law in India.
